GitHub: github.com/DariaNau/ | Portfolio: darianau.github.io/portfolio/

Full Stack Web Developer leveraging management background and a life-long dedication to learning. Effective at combining creativity, customer service experience and problem solving to ensure efficient mobile-first design and innovative web development. Known for open and clear communication to benefit teamwork and a strong commitment to achieving goals for business success.

TECHNICAL SKILLS

JavaScript | MongoDB, Express.js, React.js, Node.js | Responsive Design | Web Frameworks | Git

PROJECTS

1. TutorMe – Full Stack Web App

GitHub: https://github.com/bcancel91/Project_2 | Project: <https://tutor-me-gq.herokuapp.com/>

- A collaborative project focused on agile development methodologies and implementation of MVC design and bug fixes using the git branch workflow and pull requests. TutorMe is an E-Commerce platform to engage learning experiences for those who looking to learn, and
- Core responsibilities: User Story & User Flow | CRUD methods | Handlebars views | Sequelize ORM | front and back end user input validations | Search Bar Functionality | Database logic
- HTML5, CSS3, JavaScript, MySQL, jQuery, AJAX, Bootstrap 4, Express, Node, Handlebars, Sequelize, Moment JS, Passport JS, Anime JS.

2. Wine & Dine Web App

GitHub: github.com/DariaNau/group-project-wine-app | Project: darianau.github.io/group-project-wine-app/

- A collaborative project focused on agile development methodologies and implementation of features and bug fixes using the git branch workflow and pull requests. Wine & Dine App offers suggestions on food and wine pairings based on user's choice of grape varietal.
- Core responsibilities: Developed project plan | created User Story & User Flow | integrated three different APIs | styled dynamically generated elements from multiple AJAX calls | created basic JSON data and integrated with Algolia API for autocomplete feature | implemented animated loader.
- JavaScript & jQuery, HTML5, CSS3, two server-side APIs, four server-side APIs, JSON data objects.

3. Server-Side APIs: Weather Dashboard

GitHub: github.com/DariaNau/weather-dashboard | Project: darianau.github.io/weather-dashboard/

- The Open Weather API is used to retrieve weather data for cities. AJAX is used to hook into the API to retrieve data in JSON format. The App saves the result in Local Storage. Fully responsive.
- JavaScript & jQuery, HTML5, CSS3, Bootstrap 4, AJAX, JSON.

4. Third-Party APIs: Day Planner

GitHub: github.com/DariaNau/day-planner | Project: darianau.github.io/day-planner/

- A simple calendar application that allows the user to save events for each hour of the day. Clicking on the save button will store the time and user input in Local Storage. Each hour is color coded to reflect whether the time slot is in the past, the present, or the future. This will change depending on the time of day. Fully responsive.
- HTML5, CSS3, JavaScript, Bootstrap 4, as well as momentjs.com/library.

5. Coding Quiz App

GitHub: github.com/DariaNau/code-quiz-app | Project: darianau.github.io/code-quiz-app/

- A timer-based quiz application that calculates and stores high scores client-side. This application is also responsive, ensuring that it adapts to multiple screen sizes.
- JavaScript & jQuery, HTML5, CSS3, Bootstrap 4.
